CONSULTATION AND ANALYSIS

This is vital in determining the most effective skin care treatments to be used in facial cleaning treatments. Prior to any treatment, clients are asked questions pertaining to their everyday behavior of the skin, its condition, and daily home skin regimen. A detailed skin care history of all current and past skin products used, any medical treatments received concerning the skin are all discussed to determine the appropriate cosmeceutical skin products to be used during the treatment and home use.

DEEP CLEANSING ACIAL

Essential to the health of the skin, this professional facial is a 45-minute spa treatment that removes embedded dirt, oil, and skin impurities we often do not see with a naked eye. This deep cleansing facial will provide a relaxing therapeutic benefit that delivers visible results in skin rejuvenation while improving skin imperfections, texture, and tone.

BACK FACIAL

A back facial is a skin treatment formulated specifically for the back. Back facial targets specific skin types and conditions, clogged pores blackheads, and acne on the back. People can have trouble maintaining a skin care regimen for their back since it is hard to reach. Back facials are beneficial in gaining confidence that comes with a clear and smooth complexion.

COSMECEUTICALS

The highest quality of skin care products offered by a licensed esthetician. They are specially formulated with active ingredients in higher concentration and strengths, in order to obtain the most effective results for each individual skin type and condition.

ACNE AND BLEMISH TREATMENT

For problematic skin types, and occasional to frequent break-outs and oiliness, this therapeutic treatment offers skin products that deliver active ingredients to kill skin infections, bacteria, whiteheads and blackheads, and promote healing of the skin.

BROWN SPOT REMOVAL

This skin treatment will even skin discoloration and reveal a beautiful complexion. Our skin products are specially formulated with active ingredients to fade pigmentation. This treatment also works with eliminating ingrown hair and razor bumps.

MICRODERMABRASION

Excellent treatment for all skin types, good for obtaining softer and smoother skin. Microdermabrasion is an exfoliation process that removes dead skin cells, skin imperfections, impurities, and activates skin cell growth for a clear and more even complexion. There is a real visible change in the appearance of the skin. Great for keeping the skin healthy, youthful and beautiful.

CHEMICAL PEEL

This is an effective treatment to improve the appearance of the skin using a chemical solution to exfoliate dead skin cells and regenerate new skin cells. This is excellent for reducing fine lines and wrinkles, acne, hyper pigmentation and good for all skin types, revealing a natural and youthful complexion.
